A BILL

To amend title 10, United States Code, to ensure that members of the Armed Forces and their families have access to the contraception they need in order to promote the health and readiness of all members of the Armed Forces, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

1 **SECTION 1. SHORT TITLE.**

2 This Act may be cited as the “Access to Contracep-
3 tion for Servicemembers and Dependents Act of 2021”.

4 **SEC. 2. FINDINGS.**

5 Congress finds the following:

6 (1) Women are serving in the Armed Forces at
7 increasing rates, playing a critical role in the na-
8 tional security of the United States. Women com-
9 prise more than 18 percent of members of the
10 Armed Forces, and as of fiscal year 2019, more than
11 390,000 women serve on active duty in the Armed
12 Forces or in the reserve components. An estimated
13 several thousand transgender men also serve on ac-
14 tive duty in the Armed Forces and in the reserve
15 components, in addition to non-binary members and
16 those who identify with a different gender.

17 (2) Ninety-five percent of women serving in the
18 Armed Forces are of reproductive age and as of
19 2019, more than 700,000 female spouses and de-
20 pendants of members of the Armed Forces on active
21 duty are of reproductive age.

22 (3) The TRICARE program covered more than
23 1,570,000 women of reproductive age in 2019, in-
24 cluding spouses and dependents of members of the
25 Armed Forces on active duty. Additionally, thou-
26 sands of transgender dependents of members of the

1 Armed Forces are covered by the TRICARE pro-
2 gram.

3 (4) The right to access contraception is ground-
4 ed in the principle that contraception and the ability
5 to determine if and when to have children are inex-
6 tricably tied to one's wellbeing, equality, and ability
7 to determine the course of one's life. These protec-
8 tions have helped access to contraception become a
9 driving force in improving the health and financial
10 security of individuals and their families.

11 (5) Access to contraception is critical to the
12 health of every individual capable of becoming preg-
13 nant. This Act is intended to apply to all individuals
14 with the capacity for pregnancy, including cisgender
15 women, transgender men, non-binary individuals,
16 those who identify with a different gender, and oth-
17 ers.

18 (6) Studies have shown that when cost barriers
19 to the full range of methods of contraception are
20 eliminated, patients are more likely to use the con-
21 traceptive method that meets their needs, and there-
22 fore use contraception correctly and more consist-
23 ently, reducing the risk of unintended pregnancy.

24 (7) Under the TRICARE program, members of
25 the Armed Forces on active duty have full coverage

1 of all prescription drugs, including contraception,
2 without cost-sharing requirements, in line with the
3 Patient Protection and Affordable Care Act (Public
4 Law 111–148), which requires coverage of all con-
5 traceptive methods approved by the Food and Drug
6 Administration for women and related services and
7 education and counseling. However, members not on
8 active duty and dependents of members do not have
9 similar coverage of all methods of contraception ap-
10 proved by the Food and Drug Administration with-
11 out cost-sharing when they obtain the contraceptive
12 outside of a military medical treatment facility.

13 (8) In order to fill gaps in coverage and access
14 to preventive care critical for women’s health, the
15 Patient Protection and Affordable Care Act (Public
16 Law 111–148) requires all non-grandfathered indi-
17 vidual and group health plans to cover without cost-
18 sharing preventive services, including a set of evi-
19 dence-based preventive services for women supported
20 by the Health Resources and Services Administra-
21 tion of the Department of Health and Human Serv-
22 ices. These women’s preventive services include the
23 full range of female-controlled contraceptive meth-
24 ods, effective family planning practices, and steriliza-
25 tion procedures, approved by the Food and Drug

1 Administration. The Health Resources and Services
2 Administration has affirmed that contraceptive care
3 includes contraceptive counseling, initiation of con-
4 traceptive use, and follow-up care (such as manage-
5 ment, evaluation, and changes to and removal or dis-
6 continuation of the contraceptive method).

7 (9) The Defense Advisory Committee on
8 Women in the Services has recommended that all
9 the Armed Forces, to the extent that they have not
10 already, implement initiatives that inform members
11 of the Armed Forces of the importance of family
12 planning, educate them on methods of contraception,
13 and make various methods of contraception avail-
14 able, based on the finding that family planning can
15 increase the overall readiness and quality of life of
16 all members of the Armed Forces.

17 (10) The military departments received more
18 than 7,800 reports of sexual assaults involving mem-
19 bers of the Armed Forces as victims or subjects dur-
20 ing fiscal year 2019. Through regulations, the De-
21 partment of Defense already supports a policy of en-
22 suring that members of the Armed Forces who are
23 sexually assaulted have access to emergency contra-
24 ception, and the initiation of contraception if desired
25 and medically appropriate.
